DETAILED ACTION

Election/Restrictions

1. In response to the Applicant's election in the reply filed on 1/12/06, the Examiner agrees with the Applicant's Remarks and respectfully withdraws the restriction requirement for claims 14-17.
2. Claims 9-13 have been canceled, claims 18-19 have been added by the Applicant. Claims 1-8, 14-19 are pending, where claims 1 and 14 are independent claims.

EXAMINER'S AMENDMENT

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The application has been amended as follows:

In the Abstract, delete "**are disclosed herein**"

Allowable Subject Matter

4. Claims 1-8, 14-17 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Art Unit: 2824

The prior art of record fail to disclose a sense amplifier circuit, in combination with other cited limitation, comprising a first inverter coupled to the first input line and adapted to provide a first output signal; a second inverter coupled to the second input line and adapted to provide a second output signal; and a logic gate adapted to receive the first output signal and the second output signal and to provide a trip signal as recited in claims 1.

The prior art of record further fail to disclose a method of reading data from data lines, the method comprising disabling a sense amplifier coupled to the data lines; precharging the data lines; providing a first signal value via inverters coupled to the data lines when the data line are precharged; providing the data on the data lines after the first signal value is provided; enabling the sense amplifier to read the data placed on the data lines after the first signal value is provided, and providing a second signal value via the inverters coupled to the data lines when the sense amplifier has read the data placed on the data lines as recited in claims 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
